PROJECTS

Smart Automated Sports Referee System (SASRS) | [GitHub](#) 2026
(React · Flask · PyTorch · OpenCV · TensorFlow)

- **Identified budget-driven referee shortage as a sports player (2023); engineered AI system processing live video across 4 sports** (football, basketball, tennis, cricket) for **real-time automated officiating** with a modular, rule-based decision engine
- Reduced human error through sport-specific rule integration and sensor data fusion; deployed via Docker + CI/CD pipelines for scalable, production-ready release and seamless integration with existing analytics platforms
- **Collaborated in an agile, cross-functional team**; iterated on model performance using real-world testing feedback, achieving continuous improvement in accuracy and response time.

FixItLocal | AI-Powered Community Chatbot 2025
(JavaScript · Flask · HTML · CSS · AJAX)

- **Built end-to-end AI chatbot** - AJAX-powered real-time frontend to Flask AI backend - improving contextual query resolution accuracy and cutting average response latency via optimized dynamic content delivery; shipped responsive Tailwind CSS UI with full accessibility
- **Optimized chatbot performance** through dynamic content updates and efficient data retrieval, reducing average response latency.
