PROJECTS

Smart Automated Sports Referee System (SASRS)

React · Flask · PyTorch · OpenCV · TensorFlow

- Developed an AI-driven automated referee system that processes live video feeds across multiple sports (football, basketball, tennis, cricket) to deliver real-time, accurate officiating decisions.
- Designed a modular, rule-based decision engine integrating sport-specific rules and sensor data, significantly minimizing human error and enhancing match fairness.
- Implemented containerization with Docker and CI/CD pipelines, ensuring scalable deployments and seamless integration with existing sports analytics platforms.
- Collaborated in an agile, cross-functional team; iterated on model performance using real-world testing feedback, achieving continuous improvement in accuracy and response time.

FixItLocal — AI-Powered Community Chatbot

JavaScript · Flask · HTML · CSS · AJAX

- Implemented real-time messaging using JavaScript and AJAX, enabling seamless and low-latency user interactions within the chat interface.
- Integrated a Flask backend to process user queries and generate AI-driven contextual responses, improving resolution accuracy.
- Designed an interactive, responsive UI with HTML, CSS, and Tailwind CSS, resulting in a smooth and accessible user experience.
- Optimized chatbot performance through dynamic content updates and efficient data retrieval, reducing average response latency.
